

CHARACTER STANDARD

Titans Hockey Club believes that rather than striving to achieve individual team goals, emphasis should be towards its members and the process of them becoming the best they can be.

The following performance skills (skills necessary to do the work required) and moral skills (how you apply those performance skills) are expected from all Club members. Commitment to this standard coupled with the right attitude and performance whether it is on a match day or at training would then drive the future success of each team and the Club as a whole.
